

My Name isand I am 13 years old, my father don't have a fix job, my brother works as tailor in Casablanca and helps my father. I have 4 sisters and only 1 brother

My village is at 17 km from the girl's house

When I first knew about the girl's house I was so happy because I love to study but hate to stay at family houses.

And when I met Mrs Latifa I was happy because I felt that she will like my mother

I thank the association so much; at the girl's house we have everything that we can not have at home, such as the washing machine, fridge, internet, bathroom and rest room, hot water, private bed and cupboard and much more

Sometimes I feel sad because I miss my parent, then I convince my self that I am like the others and have to study hard.

I wish all the best to the association, and hope that one a day I will help the girl's that will come after when I will leave

At the end I thank who helped us directly or indirectly

Thanks a lot
