

My name is..... I was born in January, 1993. My father is humble worker and mother is house wife.

My first impression before joining the house

One day, I told myself where should I go to finish my study?. My family is poor and I leave so far from the school. So it better if I stop studying. By chance, one number of my family told me about the association of “Ahwad Imlil” and all the help they offer to poor students to study. They help them materially and spiritually and encourage them until they reach the success they yearn for.

My impression about the house

I meet kind girl friends and the sister Latifa, Alima and Samira. The house contains big rooms, vast bathrooms and many other things that I never dream of.

My future impression about the house

I was so happy that this association helps me to continue my study. I like so much the house because I can find here all what I need to study well and no excuse for failure.

How the other girls see our situation

They say that we are so lucky to find a big association like this who can provide us spiritually and materially to finish our study well and to reach our goal which of course success. I am proud of myself because I ma studying in that wonderful place.

Great thank you!!
