

My name is..... I have 13 years old. My father is a simple labourer and my mother is a house wife. We are 10 at home: My parents and 7 brothers.

### **My first impression before joining the house**

Before, I was thinking that if I join any enrolled House, I will not study well because of noise and too much laugh between girls. Also I was afraid to meet different girls who will make me learn different habit.

When I hear about this association “Education For All” which helps a lot of girl to study, I join them and feel really happy. It is like a light that shine my way.

### **My impression about the house**

I moved to the new house on April 2008. I am so blissful because I find all what every student is looking for so as to study well. It is gigantic house with 3 floors. It contains vast rooms, toilets, bathrooms, fireplace .They give us good food. There is even a room for the internet and a large roof where we can play in our free moments.

My study is improved well which is really good.

### **My future impression about the house**

Because of all the great efforts and support that this association offer us, I have a strong willing and desire to study very well and do all my best to reach the success and also to help in my return one day the future girls who will have the opportunity as me to study in this association.

### **How the other girls see our situation**

They are so happy for us and wish they will have the same occasion. I wish for this association a big success. The members who create the” Education for All” have done all their best to give us the best either materially or spiritually.

Thank you!!
