

I amI was born on 12/12/1991.

My father is labourer and my mother is a house wife, my brothers are seven: 04 girls and 03 boys.

I live invillage 17 km from Asni.

Impressions before joining the house

My father is the first one who think about me, he asked me first to follow my school in Casablanca, where I didn't find my seat in the school,

When my father hears that there is the one nice house for girl's education, he called me. And asked me to come joining that association,

Far from my family I thought about:

- how it is this house?
- the direction of this house?
- With what I will meet in the house?

Impressions about the house.

The house offers perfects conditions and equipment of school, only the transport is alone problem

we have certainly in the winter??

The future Impressions of the house.

Good work for the all companion's girls and for the poor families in general, doubtless the house will know

successful future.

Impressions at the leaving.

I want to thank the all association members, friends and any one help me either to follow my school

And I hope to help and improve this honourable house as possible in my life.
